

THE EXCLAIM PLATFORM

improves content claims performance

exclaim is North America's leading contents management platform, offering an easy to use, full featured contents valuation and claims management solution for adjusters. Delivered from the cloud as a Software-as-a-Service (SaaS), the system is designed to handle both high severity complex claims and high-volume, small claims – such as break and enter, theft losses.

exclaim provides measurable improvements in content claims handling performance, allowing for significant gains in efficiency, greater LKQ pricing accuracy, increased productivity (faster cycle times) with more claims processed in less time with higher claim settlement closure rates and overall better indemnity performance.

Compared to other competing products, edjuster's exclaim valuation platform has clearly separated itself in that it provides:

Multi-tiered performance management system

Comprehensive claims and management reporting option

Leading search engine capability

Easy to use receipt expenditure and reconciliation capability
